

Database Requirement Analysis

Database Requirements

User Data

- User ID
- Username
- Email
- Password
- Registration Date

News Data

- News ID
- News Title
- News Content
- Submission Date
- User ID

Prediction Data

- Prediction ID
- Prediction Result
- Confidence Score
- Prediction Date
- News ID

Admin Data

- Admin ID
- Username
- Password

Users Table

user_id (INT, Primary Key)
username (VARCHAR)
email (VARCHAR)
password (VARCHAR)
registration_date (DATE)

News Table

news_id (INT, Primary Key)
title (VARCHAR)
content (TEXT)
submission_date (DATE)
user_id (INT, Foreign Key)

Predictions Table

prediction_id (INT, Primary Key)
news_id (INT, Foreign Key)
prediction_result (VARCHAR)
confidence_score (FLOAT)
prediction_date (DATE)

Admin Table

admin_id (INT, Primary Key)
username (VARCHAR)
password (VARCHAR)

Relationships

1. One User can submit multiple News Articles.
2. One News Article generates one Prediction Result.
3. Admin manages Users, News Articles, and Prediction Records.

Functional Requirements Supported by Database

- User Registration and Login
- News Submission
- Fake News Detection
- Prediction Result Storage
- Prediction History Management
- Admin Monitoring
